

6th Central European Symposium on Plasma Chemistry (CESPC-6)

We are pleased to introduce this special issue which collects a selection of contributions to the sixth Central European Symposium on Plasma Chemistry, CESPC-6, held in Bressanone, Italy, during September 6–10, 2015. The conference, which received support by CEI – the Central European Initiative, gathered and provided a lively forum for scientists, including many PhD students and young post-docs, from 20 different countries and 4 continents. The scientific focus of the conference was on major areas of fundamental studies and applications of plasma, and included: fundamentals, modelling and diagnostics, new materials, energy technologies, environmental protection, bio- and medical-plasma technologies, surface processes. This selection of papers is well representative for the conference scientific contents.

We would like to thank all the Authors and Referees for their efforts in preparing and reviewing the manuscripts, as well as the editorial office of the EPJAP for its helpful assistance in organizing this special issue.
