

Why choose *Open Access Option* (OAO) for your article

To favor broad and easy access to all published scientific information, EPJ Applied Physics uses a service called *Open Access Option* (OAO). It offers authors the possibility to make their papers freely available to all interested readers (subscribers or non subscribers) as soon as the articles are published online, in exchange for payment of a basic fee.

With the *Open Access Option* (OAO) **the author chooses** how his article is published. The journal continues to propose the traditional publishing model, and for the growing number of scientists preferring open access, *Open Access Option* (OAO) is the solution to publishing articles free to everybody all over the world.

EDP Sciences has developed this service, which is payable by either the author, the author's institution, or their funding body. To choose ***Open Access Option*** (OAO), authors who are interested should fill out the form that is sent with the proofs and return it with the corrected proofs.

Now, you have an opportunity to publish your validated know-how on specific fields faster and with a larger visibility, than ever before.
